By typing our names and student numbers in the above table, we certify that the work in the attached assignment was performed solely by those whose names and student IDs are included above. (In the case of Project Milestone 0, the main purpose of this page is for you to let us know your e-mail address, and then let us assign you to a TA for your project supervisor.)

In addition, we indicate that we are fully aware of the rules and consequences of plagiarism, as set forth by the Department of Computer Science and the University of British Columbia

2. Project Summary

The domain of our project primarily focuses on fitness, outdoor recreation, navigation, and trail management. The application will provide users with an efficient way to organize and catalogue different kinds of trails across British Columbia. Users can plan their trail routes based on nearby facilities to ensure safety during their hiking journeys. Additionally, our project allows users to review their own trail experiences as well as create trail groups to explore the trails of British Columbia together.
